

HOW TO GET THE MOST OUT OF THE THE LEARNING HUB

A GUIDE PREPARED BY WHO CARES? SCOTLAND

WHAT IS THE LEARNING HUB?

The Who Cares? Scotland Corporate Parenting Training and Education Team have a national remit to deliver training to every corporate parent in Scotland. Our live training sessions are delivered to senior management and the most influential leaders within each corporate parenting organisation and body, though as a team we have developed resources for corporate parents to integrate within their own CPD programs for all practice staff. We have worked closely with corporate parents to support them in implementing these materials, and have developed bespoke e-learning resources. We have also co-designed the structure and content for bespoke e-learning modules. If you feel that we could support your organisation in adopting a similar approach to practice staff training, please contact our Training and Education Support Officer Rosie [here](#).

The 'Case Studies' section can be accessed through the 'Learning Hub' link in the top menu bar. This area hosts our video resources. Largely these are straight-to-camera interviews, where young people give powerful insight into their experiences of growing up in the care system. These resources are thematic, and cover a range of corporate parenting responsibilities.

When a video is clicked on, it opens in a lightbox, and can be streamed directly from the site. Options to expand to full screen and stream in HD are in the bottom right hand corner. **'Related materials' are displayed on the left-hand side**, such as accompanying PDF case studies or relevant guidance materials. **However, if you would like to download the video for internal or offline use, click on the 'Vimeo' logo in the bottom right hand corner.**
